

NATUCLAR

Process additive for beer clarification and product quality support

In brewing, achieving consistent clarity and stability is essential for maintaining product quality, visual appeal, and downstream processing efficiency.

Natuclar is a process additive intended to support clarification and improve handling during lagging operations.

Mode of Action

- Supports clarification processes during Lagging
- Assists in improving process handling and stability

Product Key Benefits

- Supports clarity of beer processes
- Contributes to Filtration consistency

Product Application

Applicable in Laggering processes

Operational Conditions:

- Make 8 to 12% slurry in deaerated water.
- Keep agitating for 60 minutes to ensure proper mixing and hydration.
- For maximum benefit a contact time of 10 minutes is recommended.
- Use CO2 sparging to ensure no Oxygen pickup during dosing.

Dosage

- 15 to 100 gm/Hl

Product Characteristics

Form: Powder

Appearance: White to off white

Product Packaging

- HDPE Drums-25 Kg each

Product Shelf Life

- Below 10°C Indefinite shelf life

Product Handling

- Store under recommended conditions
- Use appropriate PPE during handling
- Follow MSDS guidelines

ISO 9001:2015 Certified | FSSC 22000 Certified
