

NATUFINE PLUS

Process additive for supporting beer clarification and final quality consistency

In brewing, achieving consistent clarity and stability in the final product is essential for maintaining visual quality, filtration efficiency, and overall product acceptance.

Natufine Plus is a process additive designed to support clarification and improve handling during final processing stages of brewing.

Mode of Action

Natufine Plus is applied during final processing stages:

- Substantially reduces yeast settling time and thus reduces storage time.
- Significant improvements in filtration time and throughput.

Product Key Benefits

- Supports improved clarity of the beer
- Enhances process consistency
- Aids in smoother downstream operations

Product Application

Applicable in brewing processes during:

- Create 0.5% solution in cold de-aerated water.
- Retention time should be 30 minutes for proper mixing and hydration.
- Dose in the unit tanks and ensure proper mixing for optimum results.

Operational Conditions:

- Post yeast harvesting into the Unit tanks or during transfer to storage/Lagering tanks.

Dosage

- 4-6 gm/HL

Product Characteristics

- Form: Powder
- Appearance: White to off white

Product Packaging

- Available in 25 Kg HDPE Drums

Product Shelf Life

- Indefinite shelf life under cool and dry conditions.
- At 5 °C – 0.5% stock stable for 3 weeks.

Product Handling

- Store under recommended conditions
- Avoid moisture exposure
- Use appropriate PPE during handling
- Follow MSDS guidelines for safe handling
